JavaScript

```
this.insert=function(head,data){
    //complete this method
    var nuevoNodo = new Node(data);

    if (head === null) {
        return nuevoNodo;
    }

    var current = head;
    while (current.next !== null) {
        current = current.next;
    }
    current.next = nuevoNodo;

    return head;
};
```

C#

```
> using System; ...

    public static Node insert(Node head,int data)
    {
        //Complete this method
        Node nuevoNode = new Node(data);

        if (head == null)
        {
            return nuevoNode;
        }

        Node current = head;
        while (current.next != null)
        {
            current = current.next;
        }
        current.next = nuevoNode;

        return head;
    }

> public static void display(Node head) ...
```
